

During the telephone interview, Examiner and Applicant's representative discussed the objection of Drawing.

Applicant is suggested to amend the specification with Reference No. 27 for figure 9 by defining the first shell mold and second shell mold to overcome the objection of drawing.

Applicant argues that the Reference No. 26 is described on page 7 of the specification of foreign application PCT/EP05/52897, therefore, Applicant wants to amend paragraph # 28 and line 3 in the specification of the instant application by inserting - - Reference No. 26 - - between "passive side" and "of the shell mold". Applicant's argument is considered and found persuasive. Therefore, the objection of drawing for Reference No. 26 will be withdrawn in view of the proposed amendment of the specification.

/D. N. B./

Examiner, Art Unit 1791
